

# Introducing Our New Mini-COLT – Ideal for Emergencies, Disaster Recovery, and Events

The Mini-COLT is Maverick Technologies' newest solution for the challenges that carriers face - designed for deployment efficiency in collaboration with operation personnel. It's just one of our many innovative new designs that won't bust your budget!

The Maverick Pegasus Mini-Colt - a cell site that is easy to maneuver; it fits into a parking space!

- Carrier grade - fully-featured but in a compact form
- Ideal for narrow roads in metro areas
- Class C drivers can operate - no commercial drivers required
- Can be designed to your specific requirements and budget
- We can install your equipment - and give you a turnkey COLT
- Similar features to a full-size COLT
- Low CapEx & low Cost of Ownership

Pegasus Mini-Colt – includes all of these features:

- Isuzu NRR Class 5 truck with 5.2 Liter Diesel engine
- On-board 25 KW generator – no need for an additional trailer
- Pneumatic 60' mast – second mast is optional
- 2-ton air conditioner & well-insulated shelter
- Rear rack for carrying three panel antennas
- Capacity to mount up to 9 remote radio heads
- Shelter capacity for two racks – typically battery & networking

Agile and Compact - The Pegasus Mini-Colt

- Cab-over design offers great visibility and is easy to maneuver through narrow roads in metro areas
- Short wheel base allows for tight turns
- Macro capacity in a small form factor that fits into most standard parking spaces
- Ideal "jump-and-go" solution for emergency situations - nimble enough to get through tight spaces
- Small footprint minimizes lease spaces and saves \$\$
- Fast to get on the road, and efficient to deploy
