

The Saturn Series – Ideal COWs for Special Events, Disaster Recovery, and Temp-to-Perm

The Saturn mid-sized COW, by Maverick Technologies Inc., was created to be the workhorse of a Carrier's fleet - designed for deployment efficiency in collaboration with operation personnel. It's just one of many innovative designs that won't bust your budget!

The Maverick Saturn COW- rugged, long-lasting, and protective of your equipment

- Galvanized finish outlasts paint & rust
- Air-ag system cushions your expensive equipment
- Two 3-ton air conditioners for redundant cooling
- Internal/external grounding for safety
- Steel hydraulic mast will lift up to 2500 lbs.
- Built to handle changing equipment types and quantities

Saturn COW – provides a safer work environment:

- Work lights illuminate crew's nest & ground for worker safety
- Jacks & levels help ensure mast is plumb
- Roomy crew's nest platform is free of obstructions
- Tandem axles & dual wheels - 8 tires on the road for stability
- Fire Extinguisher, smoke detector, first aid kit, & eye wash station
- Automatic transfer switch for assured power

Faster/Cheaper Deployments The Saturn COW

- Front tongue retracts to minimize lease footprint
- Rear tongue for positioning in challenging locations
- 5 tool boxes & 4 storage compartments - maximize on-board storage
- Timers turn off lighting when not needed
- On-board antenna carrying system
- Reduces need for secondary deployment vehicles
